ASHLANDS - VISUAL PvE

Original mounted fighter asset preview (Blender render, not a Unity screenshot).

1. Open Unity 6000.3.23f1; keep the Game view at 9:16.
2. Outside Play: Ashlands > Validate Realistic Visuals, then Validate PvE Combat.
3. Ashlands > Open PvE Battle Scene; press Play and choose Balanced Army.
4. Preview - No Changes: watch the battle, then inspect the results.
5. Fight - Apply Result: settlement happens once; Skip only opens results.
6. Repeat from Settlement > Heroes > assign fighters > Wasteland Raid.

Shows representative fighter groups, charges, tracers and ability pulses.

The horse is a static seated model; bespoke attack and gait clips come next.

Unity and Android rendering still require testing on your machine.
