ASHLANDS - RAID PRESENTATION

1. Only your army marches toward the target from a high camera view.

2. On arrival, dust hides the action for 2.5 seconds.

3. The existing results screen opens. No fighting is shown.

TEST IN UNITY 6000.3.23f1

Outside Play: Ashlands > Validate Realistic Visuals, then Validate PvE Combat.

Ashlands > Open PvE Battle Scene > Play > Balanced Army.

Click Preview - No Changes and watch the full march / dust / results sequence.

Then try Fight - Apply Result and check the settled rewards and casualties.

Repeat from Settlement > Heroes > assign fighters > Wasteland Raid.

Preview preserves your army and rewards. Skip only opens the result.

The march lasts 4 seconds; dust lasts 2.5 seconds.

Fighter models represent groups, with badges showing their real quantities.

Foot soldiers use walk clips; cavalry has no horse gait yet.

Gameplay, syntax and reference checks run in the cloud.

Unity rendering and Android playback still need testing on your machine.
